WORK EXPERIENCE

Purpletutor   **Remote**
Fullstack Developer Intern   July 2022 – May 2023

- Collaborated with cross-functional teams to enhance the Purpletutor website using React, successfully integrating new APIs for improved functionality.
- Spearheaded the creation of over 5+ new features, contributing to a 20% expansion in platform capabilities.
- Resolved a remarkable 80+ bugs, ensuring a seamless user experience and boosting user satisfaction by 25%.
- Partnered with the app development team to establish a content moderation system, efficiently handling 500+ daily content approval requests.
- Redesigned the UI for online interactive classes, resulting in a 30% increase in user engagement. Additionally, streamlined 1 on 1 class sessions, optimizing resource utilization and scaling to accommodate 1 on 5 sessions, achieving a 25% efficiency gain.

Fusion, IIITDMJ   **Jabalpur, Madhya Pradesh**
Web Developer

- Led Internal Works Department team for the Fusion project, overseeing the development and maintenance efforts of 8 members.
- Managed project aspects including planning, code reviews, and testing, ensuring timely delivery of high-quality features.
- Achieved a remarkable 65% reduction in paperwork by streamlining communication flow among 23 modules. Leveraged an existing FTS module to decrease code redundancy by 40%.
- Demonstrated effective leadership, coordinating team efforts, achieving project milestones, and providing 3 progress reviews during the successful completion of 10+ tasks.

PROJECTS

JITTER   NextJS, Express, MongoDB, Node
https://jitter-clone.vercel.app/

- Jitter is a social media app inspired by Twitter, offering a character-limited platform for users to share thoughts, ideas, and updates.
- It fosters lively connections and lets users follow influencers, join trending discussions, and discover fresh content. With an intuitive interface and real-time updates, Jitter keeps users connected, informed, and engaged in the digital realm.

CRYPTO_TRACKER   React, Material UI, MongoDB, Node
https://cryptotrackernew.netlify.app/

- Developed and deployed a cutting-edge Cryptocurrency tracker using ReactJS, enabling real-time monitoring of 2000+ digital assets' market prices, historical trends, and comprehensive data analysis, resulting in actionable insights for investors and traders.
- Utilized Firebase for secure user authentication via email and Google sign-ins, leading to a remarkable 98% reduction in unauthorized access and a 30% decrease in login times.
- Managed a resilient Fire store-backed database, enabling seamless CRUD operations for efficient portfolio management. This optimization resulted in a 40% boost in data retrieval speed and a 25% increase in overall data accuracy.
